

BIYE JIANG

bjiang@cs.berkeley.edu

(+1) 510-326-3261

EDUCATION

University Of California, Berkeley

August 2013 - Present

PhD Student in Computer Science

Advisor: Prof. John Canny & Prof. Maneesh Agrawala

Tsinghua University

August 2009 - July 2013

B.Eng in Computer Science & Technology

RESEARCH INTEREST

I am interested in building toolkits for modern data scientists who will usually work on prototyping new models or running experiments on large scale dataset. Our methodology includes but not limit to using hardware accelerations like GPU, providing implementation framework for machine learning algorithms, building visual interface for real-time control and monitoring.

Boosting low-level machine performance and improving human productivity are both important for modern data analytic tasks. My research is also trying to bridge the gap between users and the complex machine learning systems, especially those deep neuron networks.

ACADEMIC SERVICE

Organized Workshop on Visualization for Deep Learning at ICML 2016

INTERN EXPERIENCE

Research Intern at Microsoft Research, Redmond

Summer 2015

Work with: Saleema Amershi, Ran Gilad-Bachrach, Mikhail Bilenko Machine Teaching Group, MSR

· Building toolkits to help data scientists debugging machine learning algorithms. Extended work from ModelTracker.

Research Intern at Adobe

Summer 2014

*Work with: Zhicheng Liu, Mira Dontcheva, Wilmot Li, Jovan Popovic**Adobe Research*

- Building toolkits to help people easily create Infographics without writing code.

Student Cluster Challenge

Spring 2013

*Advisor: Prof. Xiaomeng Huang**HPC group, Tsinghua*

- Exploring the best configuration for Linpack benchmark and HPC applications like Gromacs, WRF
- Performance tuning on cluster equipped with NVIDIA K20, Intel MIC.

Stanford Undergraduate Visiting Research Program

Summer 2012

*Advisor: Prof. Jeffrey Heer**Visualization Group, Stanford*

- Project: Interactive Visual Analysis of Large Scale Geographic Data using WebGL
- Our novel approach applies WebGL-based parallel computation to enable rapid interaction in browsers.
- Much faster for data aggregation and rendering comparing to conventional SVG approach.

Research Intern on Image processing

Jun 2011 - Jan 2013

*Advisor: Prof. Kun Xu and Prof. Shimin Hu**Graphics Computing Group, Tsinghua*

- Project focusing on recovering image editing operator given the edited image and the source.
- Project focusing on the interesting human vision phenomenon: change blindness. Developing saliency model to measure such difficulty.

TECHNICAL STRENGTHS

**Programming Languages
Tools, Libraries**C/C++, JavaScript, Scala, Java, R, Python, SML, Lisp, MATLAB
D3, BIDMat/Mach, Theano, WebGL, CUDA, Spark, OpenCV, MPI**TEACHING EXPERIENCE**

Graduate Student Instructor

Fall 2014

–CS194/294 Introduction to Data Science

COMPETITION AWARD

ACM International Collegiate Programming Contest

2009 - 2015

–6th Place (Silver Prize) in the World Finals

2015

–Champion in Pacific NorthWestern Region Contest (Advancing to the World Finals)

2013, 2014

–Champion in Asia Hangzhou Regional Contest

2012

Student Cluster Challenge at International Supercomputing Conference2nd Place 2013**Asia Student Supercomputer challenge**

Champion

2013

Baidu A-Star Programming Competition3rd Place out of over 30,000 contestants

2011

Youdao Programming Competition5th Place out of over 21,000 contestants

2010

National Olympic in Informatics Competition6th Place out of 295 contestants

2008
